ONLINE MEETING
For COID’s Pilot Butte Watershed Plan/Environmental Impact Statement

Wednesday, October 20, 6pm to 7pm
www.CoidPiping.com

The online public meeting will be conducted using Zoom. You can participate by computer, tablet, or telephone. Visit www.CoidPiping.com and click the link to attend.

Please join COID for an online informal public scoping meeting for improvements being considered to the aging infrastructure of the Pilot Butte Canal System.
AT THE ONLINE MEETING, THE PROJECT TEAM WILL:

• Describe the proposed project
• Explain the process for an Environmental Impact Statement and the National Environmental Policy Act
• Describe how the public can provide input and learn more about the project
• Provide the project’s purpose and need
• Present the schedule and project steps

The proposed project, located in Deschutes County, is a continuation of COID’s modernization of the main stem of Pilot Butte Canal, 25 miles from current improvements in Redmond, Oregon to its diversion in Bend, Oregon.

Beginning in October, crews will be conducting exploratory work to gather information about existing conditions including the built and natural environment.

The Pilot Butte Canal conveys water to 17,338 acres and experiences approximately 156 cfs or 50,625 acre-feet of loss due to the volcanic nature of Central Oregon’s geology.

Additional information and a recording of the meeting will be available afterward at www.coidpiping.com.
